Free Online CDL Theory Training

Most individuals seeking to obtain a Commercial Driver's License (CDL) must complete Theory training and Behind-the-Wheel (BTW) training. Specific to Alaska, if you will not be on the state maintained highway system you can get an off-highway CDL license by taking a theory test and meeting other standard driver's license requirements. More information on the Alaska Off-Highway CDL can be found at <https://dmv.alaska.gov/credential-services/guide-to-rural-driving-information/#cdl>.

The Ohio LTAP Center, as a program within the Ohio Department of Transportation's Office of Local Programs, is providing CDL Theory training free of charge via eLearning that is open to Alaska residents. The Theory eLearning modules provided cover the training and testing required for individuals seeking a Class A CDL, a Class B CDL and an upgrade from a Class B to a Class A CDL. You must begin with the first module and work progressively through them as each module is a prerequisite of the next module in the series.

Once you have completed the final module for your license type, you will be able to take the exam. If you do not pass the exam, you will be able to complete retakes. Upon successfully passing the exam, your Theory training completion will be reported to the Federal Motor Carrier's Training Registry within two business days. (Business days do not count weekends or State of Ohio holidays.) At the beginning of the exam, you must provide your driver's license number, state of issue and agree to have your information shared with the FMCSA.

Inputting your information incorrectly will cause a delay in your completion being reported to the FMCSA. If you do not agree to have us share your information with the FMCSA, then you will not be able to take the exam. Alternatively, you can take the written exam at a local DMV in Alaska or contact a proctor in your area.

The CDL Theory training modules being provided by Ohio LTAP were developed by the Clear Roads pooled fund program, with funding from State Departments of Transportation (DOTs). As the Theory training provided by Ohio LTAP is available at no charge, it complies with the FMCSA training requirements. The training can be accessed at <https://www.transportation.ohio.gov/programs/ltap/elearning/cdl>.

Alaska Tribal Technical Assistance Program

We acknowledge the Alaska Native nations upon whose ancestral lands our campuses reside. In Fairbanks, our Troth Yedha' Campus is located on the ancestral lands of the Dena people of the lower Tanana River.

Upcoming Events

Construction of Roads and Airfields on

Permafrost Class *November 7, 2024*

The AKTTAP in the AIDC at the University of Alaska Fairbanks in partnership with the Alaska Local Technical Assistance Program invites you to a 1-day training course on Roads and Airfields Constructed on Permafrost. The course will be offered on November 7, 2024 in the BP Design Theater on the UAF campus, Fairbanks, Alaska. This course provides the practicing engineer with the basic knowledge required to build roadway and airports over permafrost terrain. Topics covered include an overview of permafrost, geotechnical investigations, slope stability, impacts of climate and adaptation strategies during the design, construction, and maintenance phases. Please register for the course at https://reg.learningstream.com/reg/event_page.aspx?ek=0107-0030-8208004c904c448eb4456ed7292d54c6. If you have not used the system previously, you will need to create an account.

Gravel Roads Training

February 2024

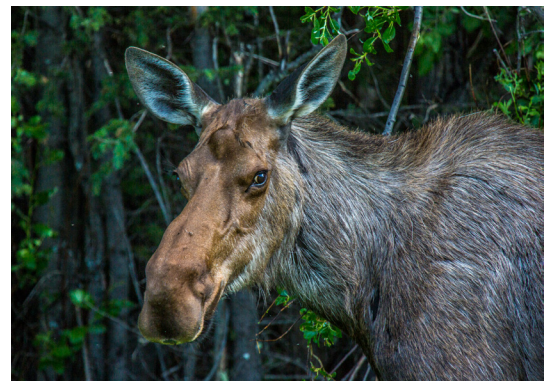

The AKTTAP in partnership with the Local Technical Assistance Program (LTAP) for Alaska will be presenting a 2-day class on the construction and maintenance of gravel roads. Topics covered will include routine maintenance, drainage and dust management. The course will be offered in Anchorage and in Juneau the week of February 10th. Registration will open in December for the class once details are finalized.

Past Webinars Available on YouTube

Ongoing

Every webinar sponsored by the AKTTAP is recorded and posted to the AIDC channel on YouTube. Topics currently available are Dust management, Updating Your LRTP, Ice Roads Funding, and DOT Grants Dashboard Demonstration. The dedicated AKTTAP playlist can be found at [AKTTAP Playlist](#). Topics scheduled for the fall of 2024 include the TTP Funding Formula, the WRAP grant programs from Alaska DOT, and NRCS trail information.
